

**Kimberley:**

My impression of older people like to my Nan and my, like my Gramp that I have two Gramps. One of my Gramp's he trains people in karate so that's like, when I first found out I was really surprised because I thought so old, like elderly people all sit and like knitting or something like that. Um, but I was proved wrong and my Gramp he has a big bike a massive bike like a kind of motorbike but four wheels. But before I knew all that my, the, my impression on olden elderly people were that they just sat around and warmed up by the fire. I wouldn't mind doing that myself um, like doing some knitting. That's how I thought elderly people would be like.
