

Maria Townsend: Hello, I'm Maria Townsend and I've been a tutor with the Open University for over 10 years helping adult students get to grips with maths. I am here to guide you through Succeed With Maths Part 1, a free badged course. The badge will give you recognition for your achievements.

The course will develop your skills in maths over the next eight weeks by taking a step by step approach and using everyday examples. Starting with how to put numbers together before moving onto fractions, percentages, and negative numbers you'll also learn how to solve everyday puzzles. So good luck and see you in week one.
