What's M World expected to achieve? I suppose, I mean, if I was being silly, I'd say it would enable students to work together in a more coherent way in their teams and groups. But I think that's probably asking a lot of a comic, as one sort of contribution to a whole set of teaching. I think it can encourage some behaviours, make people look wryly at what they're doing already. Maybe see themselves in some of the characters, and smile a little bit about some of the behaviour.

Yeah, I think also it's just good to-- one of the simplest and perhaps most obvious things that it does is underline, you know, what is good behaviour, and what is the correct way to behave towards somebody, and what isn't. This is interesting because it's a comic that's being used to talk about ideas. It's being used to talk about social conduct.

It's being used to talk about underpinning ideas of how we see ourselves and how that affects our behaviour with each other. And if they think, oh, if one person reads it and didn't realize that comics could do that, I think that would be a good thing.
