

Describing language trailer

NARRATOR

Language makes the world go around. We use it every day to communicate with others, to make sense of what we see and hear, and to express how we feel. But do you know how language works?

What are the building blocks that we use to create the words and sentences we need to convey our meaning? In 'Describing language', you'll learn the basics about the key components of language. You'll start by looking at words before moving on to see how words fit together in phrases and sentences.

While this course focuses on English, you'll encounter examples from other languages too and you'll get the opportunity to test your newfound linguistic skills. If you've ever been curious about the nuts and bolts of language and how all the moving parts fit together, then this is the course for you.
