

Understanding Social Change

Change, diversity and uncertainty are unavoidable features of modern life. Collectively, we may be living through a major transformation in society and the traditions that hold it together. Individually, we may face increasing barriers to taking responsibility for our own destinies, exercising power and making our own decisions. The tracks on this album focus on these and other big issues in the contemporary world. The past and the future- the Welfare State through to Globalisation. The material was originally produced to support the course DD100, Introduction to the social sciences.
