

### **Social Care: Past and Present**

Issues surrounding care and welfare affect people in many different ways - it may depend on individual circumstances or on the location and nature of the community. The tracks on this album look at welfare issues faced by different communities across the UK, focusing mainly on care of the elderly, and people with physical or mental disabilities. The album also explores how care and welfare in the community has changed over the years. The material forms part of the course K202, Care, welfare and community.
