

A Buen Puerto

Introduction

These video and audio tracks were designed to accompany the Open University Course *A Buen Puerto*, an advanced Spanish course. They give practice in listening to sometimes quite extended pieces of Spanish, recorded throughout the Spanish-speaking world. The idea is to understand the gist rather than every word and to become familiar with different accents from Latin America and Spain. Try just watching and listening to understand as much as possible, though there are transcripts available if you need to check something.
