

## **Radiotherapy and its physics**

*The role of a clinical technologist*

### **Andrew Daggart (talking to Kim Hare)**

How many patients do you use, work with using this material?

### **Kim Hare (talking to Andrew Daggart)**

This has been used for many, many years and it's been used nationally for many years but a lot of centres now have moved over to the...

### **Kim Hare**

My name's Kim Hare and I work here as the Mould Room Technician within Radiotherapy. The Mould Room comes within Radiotherapy departments and it's basically it's to make the equipment to enable people to be immobilised for their radiotherapy treatment. So we can immobilise any part of the body. I came in as a radiographer assistant, was very very interested from the start in the mould room and came in regularly to help, help out the person who was working in here at the time, gradually I showed more and more interest and worked through competencies and applied for the vacancy that became available, and taken over the Mould Room myself and run it permanently myself now.

### **Kim Hare (talking to Andrew Daggart)**

Will actually hold the patient as firmly as ...
