

MARIA TOWNSEND: Hello. My name's Maria Townsend. And I've been a tutor with the Open University for over 10 years, helping adult students get to grips with maths. I'm here to guide you through Succeed with Maths Part Two, a free badged course. The badge gives you recognition of your achievements on the course and lets you share them with anybody you like. The course builds on Succeed with Maths Part One, covering measurement, patterns, shapes, and working with data, all using everyday examples. Good luck, and see you in week one.
